

VIBEATHON SUBMISSION

AROS

Autonomous Revenue Operations System

AI-Powered Revenue Execution Engine

"Salesforce shows what happened. Gong explains why. AROS decides what to do — and acts."

⚠️ THE PROBLEM

Current revenue tools — Salesforce, Gong, Marketo — provide data and insights, but fall short:

- Require constant manual monitoring
- Depend on human follow-up
- React only after problems occur
- Lead to missed opportunities & lost revenue

✓ THE SOLUTION

AROS acts as an AI revenue operator — not just a reporting tool:

- Detects stalled deals and unworked leads
- Prioritizes risks across the entire funnel
- Recommends or executes corrective actions
- Tracks outcomes and measures impact

KEY CAPABILITIES

Executive Command Center

Real-time pipeline health, AI impact metrics, and revenue KPIs at a glance.

Funnel Monitor

Unified view of opportunities and leads with intelligent risk scoring.

AI Decision Engine

Identifies issues with confidence scores and recommends next best actions.

Action Layer

Simulates or triggers tasks, alerts, and outreach — automatically.

Activity Feed

Real-time tracking of AI actions, decisions, and measurable outcomes.

Recovery Spotlight

Demonstrates AI-driven deal recovery with clear revenue impact.

"Salesforce shows what happened. Gong explains why. AROS decides what to do — and acts."

Capability	Salesforce	Gong	AROS
Monitoring	Dashboard only	Call analysis	Continuous AI
Decisions	Human required	Human required	Autonomous AI
Execution	Manual tasks	No action	Automated actions
Signal Connection	Single system	Single system	Cross-system
Operation Mode	Reactive	Reactive	Proactive, 24/7

BUSINESS IMPACT & WHO BENEFITS

Pipeline Conversion

Higher rates through AI prioritization

Manual Monitoring

Reduced overhead & human dependency

Lead Response Speed

Faster follow-up, fewer missed deals

At-Risk Revenue

Recovered through AI-driven actions

Scale Operations

Grow without additional headcount

WHO BENEFITS

Sales Reps

Clear priorities & automated follow-ups — spend time selling, not searching.

Managers

Real-time visibility into pipeline health and fewer missed deals.

RevOps

Reduced manual work, streamlined workflows, and improved efficiency.

Leadership

Higher revenue performance through autonomous, data-driven execution.

TODAY — WORKING PROTOTYPE

- ✓ Built as working prototype in Pave
- ✓ Simulated data and AI-driven actions
- ✓ Full decision-to-action workflow proven
- ✓ Safe demo environment — no live connections

Built on Quickbase — demonstrating the full power of AI-driven workflow automation on the platform.

TOMORROW — FULL INTEGRATION

AROS is architected to connect across your full revenue stack:

→ Salesforce

Task creation & opportunity updates

→ Outreach / Marketo

Automated campaign execution

→ Slack / Email

Intelligent alerts & notifications

Goal: Fully automated, AI-driven revenue operations at scale — on Quickbase.

KEY TAKEAWAY

From *reporting on revenue*

operating revenue with AI

Autonomous

No manual intervention required

Continuous

Operates 24/7 across all signals

Intelligent

Decisions backed by AI confidence
